Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM
THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

Claims 7, 10, and 11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The use of the word "exhaust" throughout these claims is confusing and should probably be changed to --blowby--.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, 2, 5, 6, and 12-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tochizawa (6,009,863). Tochizawa shows everything except the system being utilized in a motorcycle and an air filter. Not a conduit 4-5, between a chamber 1 and the intake manifold 2, which includes a tapered portion (see Figures 2 and 4). It would have been obvious to one having ordinary skill in the art to utilize the device in a motorcycle and to employ an air filter since it is conventional to utilize engines in motorcycles and air filters are required elements in engines.

Claims 1, 5, 6, 8, and 12-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lohr et al (6,095,105). Lohr et al show everything except utilizing the device in a motorcycle. It would have been obvious to one having ordinary skill in the

art to utilize the device in a motorcycle since it is conventional to utilize engines in motorcycles. See Figure 4, which shows a conduit (below 108), between a chamber 30 and the intake manifold 14, which is wider at the area where the conduit communicated with it and narrower at passages 162, which lead to the combustion chambers of the vee-type engine.

Allowable Subject Matter

Claims 3 and 4 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 7 and 9-11 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
